**SYNTOL CORSE LIGHT GEAR OIL - 100%  
SYNTHETIC ESTER MATRYX® TECHNOLOGY**

- 100% Synthetic ester matryx® technology
- Releases more power than previous generation gear oils, without sacrificing gearbox durability
- Highly resistant to permanent viscosity loss, especially important for motorcycles with highly loaded gearsets
- Market leading deposit control chemistry
- Excellent static and dynamic friction characteristics for perfect oil immersed clutch operation during initial engagement, constant speed and acceleration phases

Suitable for use in all Honda®, Yamaha® and other road & off-road motorcycle gearboxes with wet or dry clutch. Syntol corse gear light must not be used in engine (crankcase) applications.

**SYNTOL STRADA LIGHT GEAR OIL - SYNTHETIC ESTER MATRYX® TECHNOLOGY**

- Synthetic ester matryx® technology
- Resistant to permanent viscosity loss, especially important for motorcycles with highly loaded gearsets
- Market leading deposit control chemistry
- Excellent static and dynamic friction characteristics for perfect oil immersed clutch operation during initial engagement, constant speed and acceleration phases

Suitable for use in all Honda®, Yamaha® and other road & off-road motorcycle gearboxes with wet or dry clutch where SAE 10W-30 and API SG / SH / SJ / SL / SM / SN and/or JASO MA2 / JASO MA performance specifications are recommended. Syntol coarse gear light must not be used in engine (crankcase) applications.

**SYNTOL UNIVERSAL BRAKE FLUID DOT 3 AND 4 - 500ML**

- 100% Synthetic technology
- Compatible & mixable with dot 3, 4 & 5.1 Fluids
- High dry boiling point ensures effective braking even in extreme conditions
- High wet boiling point enables long fluid life

Suitable for all hydraulic brake and clutch applications where a dot 3 or dot 4 fluid is recommended for use.

## WE HAVE IT COVERED

**SYNTOL NERO-R ULTRACOOOL RTU READY TO USE RACING MOTORCYCLE ENGINE COOLANT**

- Pre-mixed ready to use formula – do not dilute
- Glycol free so may be used on road racing circuits
- Employs leading nitrite, phosphate, borate, silicate and amine free organic acid inhibitor technology
- Protects cooling systems, including those with magnesium and aluminium components, from corrosion and deposits
- Outstanding thermal conductivity and heat transfer capabilities for maximum heat removal when compared to conventional glycol based coolants.
- Up to 20° temperature reduction through use of proprietary inhibitor chemistry
- Compatible with all coolants so no flushing of system required, simply drain old fluid and replace with Nero-R ULTRACOOOL RTU

| PART NO.       | SIZE.   |
|----------------|---------|
| <b>F0067-1</b> | 1 Litre |

Suitable for use in all road & off-road racing motorcycles with a liquid cooling system where ASTM D3306, D4985 or BS 6580 performance specifications are recommended.

**Important:** Nero-R ultracool RTU does not offer any antifreeze protection as it does not contain glycol, if antifreeze protection is required use Corse cool RTU.

**SYNTOL CORSE COOL RTU READY TO USE MOTORCYCLE ENGINE COOLANT**

- Ready to use -40°C formula – do not dilute
- Employs leading nitrite, phosphate, borate, silicate and amine free organic acid inhibitor technology
- Protects cooling systems, including those with magnesium and aluminium components, from corrosion and deposits
- Excellent thermal conductivity and heat transfer capabilities
- Compatible with all coolants so no flushing of system required, simply drain old fluid and replace with Syntol Corse cool RTU
- Suitable for 5 years service, 6000 hours of engine operation or 250,000km, or according to oem recommendation - whichever occurs sooner

| PART NO.       | SIZE.   |
|----------------|---------|
| <b>F0051-1</b> | 1 Litre |

For use in all road & off-road motorcycles with a liquid cooling system where ASTM D3306, D4985, SAE J1034, British standard (BS) 6580:2010, BTC type 4E, JIS K2234 (except reserve alkalinity), CUNA NC 956-16, NATO S-759 or UNE 26361-88 performance specifications are recommended.

**Important:** contains glycol so cannot be used on road racing circuits, for this application use Nero-R Ultracool RTU.

**SYNTOL NERO-R SX 3.5 RACING MOTORCYCLE SHOCK FLUID - 100% SYNTHETIC COMPLEX-ESTER MATRIX® TECHNOLOGY**

- One of the world's most fade resistant motorcycle shock absorber fluids provides consistent damping performance regardless of riding time
- **Typical viscosity @ 40°C = 12.3 CST**
- 100% Synthetic complex-ester matrix® technology
- Market leading anti-friction additive chemistry results in extremely low internal shock friction
- Contains special additives to condition seals which keeps them supple and leak free
- Powerful foam inhibition technology provides outstanding gas (e.g. Air, Argon, Nitrogen) entrapment and release performance as well as excellent resistance to foaming
- Extremely long service life due to exceptional oxidation resistance
- Ultra pure, extremely high cleanliness to ensure no risk of blockage or restriction in advanced shock valving

## COMPLEX-ESTER MATRIX

COMPLEX-ESTER MATRIX® TECHNOLOGY IS A COMPLEX COMBINATION OF ADVANCED SYNTHETIC ESTERS EACH SELECTED TO IMPART DESIRABLE CHARACTERISTICS TO OUR RACING OILS, BUT WHEN COMBINED CREATE A SYNERGISTIC EFFECT RESULTING IN EVEN HIGHER PERFORMANCE. FOR EASE OF IDENTIFICATION, ANY SYNTOL PRODUCT CONTAINING COMPLEX-ESTER MATRIX® TECHNOLOGY IS ALWAYS BLUE IN COLOUR

MADE IN THE UNITED KINGDOM

**SYNTOL NERO-R SF 2.5WT RACING MOTORCYCLE FORK FLUID - 100% SYNTHETIC COMPLEX-ESTER MATRYX® TECHNOLOGY**

- 100% Synthetic complex-ester matryx® technology
- **Typical viscosity @ 40°C = 15.0 CST**
- Naturally high viscosity index, polymer free formulations ensure that these products will not lose their fade resistance over their entire lifetime
- Market leading anti-friction additive chemistry results in extremely low internal fork friction
- Consistent damping performance regardless of riding time.
- Contains special additives to condition seals keeping them supple & leak free.
- Powerful foam inhibition technology provides outstanding gas (e.g. Air, argon, nitrogen) entrainment and release performance as well as perfect resistance to foaming.

## SYNTOL CHAINLUBE-RR MOTORCYCLE ROAD AEROSOL 400ML

- 100% Synthetic technology
- Advanced anti-fling chemistry
- Market leading anti-friction additive chemistry results in extremely low rolling resistance & minimizes drivetrain power losses
- Contains special additives to condition seals including o-ring, x-ring & z-rings which keeps them supple and leak free
- Water and corrosion resistant
- Increases lifespan of chain and drive sprockets
- Maintains lubricating properties even at high temperature

For all road going motorcycles including racing applications where standard, o-ring, x-ring or z ring chains are in use.

**Do not use for off road applications**

| PART NO.         | SIZE. |

## SYNTOL CHAINLUBE-SX OFF-ROAD AEROSOL 400ML

- 100% Synthetic technology
- Does not attract dirt or sand
- Advanced anti-fling chemistry
- Market leading anti-friction additive chemistry results in extremely low rolling resistance & minimizes drivetrain power losses
- Contains special additives to condition seals including o-ring, x-ring & z-rings which keeps them supple and leak free
- Outstanding water and corrosion resistance, critical
- Increases lifespan of chain and drive sprockets
- Maintains lubricating properties even at high temperature

For all off-road motorcycles including racing applications where standard, o-ring, x-ring or z ring chains are in use.

**SYNTOL EVAP-1 MULTIFUNCTIONAL, FAST EVAPORATING SOLVENT DEGREASER AEROSOL 400ML**

- Powerful multipurpose degreaser removes the need for multiple products, resulting in a single product for many applications
- Dissolves oil, grease & tar quickly without agitation
- Evaporates extremely quickly leaving no residue
- Non chlorinated formulation

For brake, clutch, chain, electrical contact, engine and chassis component degreasing. **Do not** use on plastic, painted, coated or lacquered surfaces.

| PART NO.         | SIZE. |

| <b>F0089-400</b> | 400ml |

**SYNTOL MAINTANOL MULTI-USE MAINTENANCE SPRAY AEROSOL 400ML**

- Premium technology
- Advanced anti-corrosion chemistry
- Contains special additives to condition seals which keeps them supple and leak free
- Outstanding moisture resistance and humidity protection
- Excellent deep penetrating performance to release even the most stubborn components
- Good lubricating properties to provide smooth operation of parts

General lubrication of all mechanisms, e.g. Levers, cables, pivot points, clutch mechanisms, etc. Rust & corrosion protection of components such as exhausts, engines, Penetrating of components such as nuts, bolts, cables & other seized mechanical parts.

| PART NO.         | SIZE. |

**SYNTOL WATER RINSABLE PARTS SOLVENT DEGREASER AEROSOL 400ML**

- Anti-corrosion properties
- Dissolves oil, grease & tar quickly without agitation
- Non chlorinated formulation
- Water rinsable

For metallic engine and chassis component degreasing. **Do not** use on plastic, painted, coated or lacquered surfaces.

| PART NO.         | SIZE. |

| <b>F0096-400</b> | 400ml |

**SYNTOL MOTORCYCLE GLISTEN SPEED WASH CONCENTRATE 1 LITRE**

- Powerful concentrated detergent efficiently dissolves dirt, dust, oil & traffic film quickly
- Dries without residue
- Leaves an imperceptible anti-corrosion film to help protect metallic components
- Biodegradable formulation to help protect the environment

A powerful cleaner & degreaser designed for use on all parts of road and off road motorcycles. May be used on plastics, paintwork, lacquer, metals, composites, synthetic fabrics & more.

**SYNTOL GLAZE MOTORCYCLE SILICONE SHINE AEROSOL 400ML**

- Premium technology
- Contains special additives to condition & revive colour of tarnished or dull parts
- Repels moisture and dirt
- Good lubricating properties
- Leaves a protective film

Used to shine / polish the whole motorcycle. May be used on fairings, plastics, paintwork, lacquer, carbon fibre and more. Use glisten speed wash to clean the motorcycle prior to application if required.

**SYNTOL NERO R AIR FILTER OIL AEROSOL 400ML**

- 100% Synthetic complex-ester matrix® technology
- Improves air filter efficiency
- Effectively retains mud, sand, dust & dirt to extend engine life
- High cling formulation helps maintain coverage on filter
- Blue coloured to aid successful coverage of filter

Suitable for the maintenance of all off-road motorcycle & atv foam air filter elements.

| PART NO.         | SIZE. |

**SPEED SHOOTER**

*(For increased performance).*  
Increases acceleration Improves engine performance.  
Promotes optimum combustion.  
Residue-free combustion.  
For 4-stroke and 2-stroke engines.  
One 80ml Shooter is sufficient for 10L of fuel.  
Recommended use at every refuelling.

| PART NO.       | DESCRIPTION. |
|----------------|--------------|
| <b>LQM3823</b> | 24pcs Tray   |

**4T SHOOTER**

*(For improved economy).*  
Fuel system cleaner.  
Optimises engine performance.  
Improves fuel economy.  
Reduces emissions. Corrosion protection.  
Suitable for carb and fuel injected engines.  
For 4-stroke engines.  
One 80ml Shooter is sufficient for 5-10L of fuel.  
Recommended use at every refuelling.

| PART NO.       | DESCRIPTION. |

| <b>LQM3824</b> | 24pcs Tray   |

**ENGINE FLUSH SHOOTER**

*(For enhanced engine life).*  
Oil circuit flush and clean.  
Restores engine performance.  
Thorough engine cleansing.  
Promotes longer engine life.  
Will not harm seals or gaskets.  
Safe for catalytic converters.  
For 4-stroke engines.  
Use between oil changes.

## THE IGNITION SPECIALIST™

NGK spark plugs push the limits of performance and innovation, bringing the most advanced technology in today's high-efficiency engines. From the Iridium IX to the industry standard OE-style spark plugs, NGK drives the future of spark plug engineering.

### NICKEL SPARK PLUGS

Performance Spark Plugs

NGK nickel spark plugs feature a specially designed v-groove center electrode, improving ignitability and reducing quenching. The 98% pure copper core delivers increased heat dissipation for more reliable starts and reduced risk of overheating.

### IRIDIUM IX® SPARK PLUGS

High Performance Spark Plugs

The improved throttle response, superior anti-fouling and high-ignitability makes Iridium IX® ideal for the performance enthusiast. Iridium's extremely high melting point is perfectly suited to today's high-temperature engines, delivering outstanding acceleration, fuel efficiency and durability.

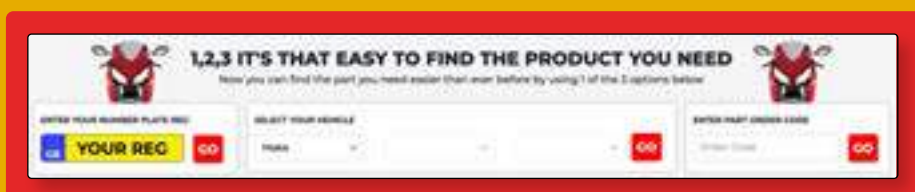

### LASER IRIDIUM SPARK PLUGS

OE Legacy and Performance

NGK spark plugs come standard on more vehicles in North America than any other manufacturer. The OE-style spark plug line brings that original equipment spark plug to the automotive aftermarket, delivering OE fit, form, function and performance for your engine.

A fully comprehensive range of NGK spark plugs for Japanese and European road & off road bikes head over to our website for more details.

## INTACT BIKE-POWER BATTERIES

IntAct Bike-Power, a German motorcycle battery brand, is available in a complete range of starter batteries in series **Classic**, **AGM**, **SLA**, **GEL** and **HVT** suitable for motorcycles & scooters. **For bike fitment use the PartsFinder online at [www.bikeittrade.com](http://www.bikeittrade.com)**

### BIKE POWER **CLASSIC**

Low-maintenance lead-acid battery | dry-charged, acid pack included

#### POWERFUL AND SUSTAINABLE.

A solid battery with no frills that delivers high start power, achieves a long service life with regular maintenance and has excellent recycling properties.

**Features:** >> Solid Battery with no frills >> Achieves a long service life with regular maintenance  
>> Excellent Recycling Properties >> Central Degassing >> Dry-Charged >> Acid Packs Included

### BIKE POWER **AGM**

Sealed AGM battery (electrolyte absorbed in glass fibre mats) | dry-charged, acid pack is included | maintenance-free after initial filling

#### COST-EFFECTIVE ALL-ROUNDER.

Withstands the charge cycles slightly better than conventional flooded batteries during seasonal use and over many short distances, and also starts reliably when not fully charged.

**Features:** >> High power reserve. Significant start-up power when partially discharged  
>> Shake-proof >> Maintenance-free after initial filling >> Leak-proof >> Mountable in tilted position (45°).  
>> Dry-Charged >> Acid Packs Included

### BIKE POWER **SLA**

Sealed maintenance-free AGM battery (electrolyte absorbed in glass fibre mats) | wet charged

#### READY-TO-USE ALL-ROUNDER.

Withstands the charge cycles slightly better than conventional flooded batteries during seasonal use and over many short distances, and also starts reliably when not fully charged.

**Features:** >> High power reserve. Significant start-up power when partially discharged  
>> Shake-proof >> Completely maintenance-free >> Leak-proof. Mountable in tilted position (90°).  
>> Filled and charged. Ready for immediate use

### BIKE POWER **GEL**

Sealed maintenance-free GEL battery | electrolyte thickened into a gel-like mass | wet charged

#### FOR NUMEROUS SOURCES OF ELECTRICAL POWER DRAIN.

Provides 30% more start power for modern motorcycles with many sources of electrical power drain and covers peak consumption. Low self-discharge, bike starts reliably even after up to 3 months.

**Features:** >> Low self-discharge for seasonal use >> Even more cycle-resistant than AGM or SLA  
>> Excellent vibration resistance >> 30% more starting performance than classic battery >> Completely maintenance-free.  
>> Filled and charged. Ready for immediate use

### BIKE POWER **HVT**

Sealed maintenance-free AGM battery with heavily compressed plate packs | electrolyte absorbed in glass fibre separators

#### EXTREMELY VIBRATION RESISTANT DESIGN.

For difficult terrains and excessive engine vibrations. The durable energy bundle absorbs the strongest shocks from Harleys and other big displacement bikes, and also launches two-wheelers with a high demand for electrical energy (e.g. with ABS).

**Features:** >> Perfect for Harley Davidsons and other motorcycles with high capacity 2-cylinder engines  
>> Highest cold cranking amps. >> Extremely vibration-resistant. >> Robust housing made of impact-resistant plastic.  
>> Leak-proof. Mountable in tilted position (90°). Acid held in glass fibre separators

## INTACT BIKE-POWER LITHIUM IRON LiFePO4 BATTERIES

Sealed maintenance-free Lithium iron phosphate battery (LiFePO4).

Small top-of-the-range powerhouse with long service life. Perfect for racing, and whenever every gram or centimetre matters. Thanks to balancing, the battery ages more slowly, keeping its full capacity for longer.

Lithium ion technology is the leading battery technology today and is a must for riders of two-wheel vehicles for whom space and weight play a part, e.g. in motor sport or long off-road trips. This is the perfect battery for all motorcycles fitted or upgraded with a high level of technical equipment, together with jet skis, snow mobiles and ride-on lawnmowers, which have to be ready to use quickly at any time. Thanks to the adapter pads (supplied), **you can cover 90% of all standard battery types with 8 different lithium batteries.**

### BENEFITS AS A DEALER

With only 8 different types, up to 90% of all common types of batteries can be covered. That's why: very little storage space is required. Can be stored for an (almost) unlimited period. Premium range for customers looking for the latest technology

## LITHIUM

Sealed maintenance-free lithium iron phosphate battery (LiFePO4)

Perfect for racing, and whenever every gram or centimetre matters. Thanks to balancing, the battery ages more slowly, keeping its full capacity for longer.

**Features:** >> Long service life thanks to intelligent battery management with balancing >> Weight savings of up to 75% compared to a conventional motorcycle battery. >> Low self-discharge. >> Extremely fast charging. >> Special heat-resistant nylon housing with cast brass poles, waterproof (LI-01 to LI-08) >> Ready to install and ready to use. >> Absolutely deep discharging. In contrast to lead-acid batteries, almost 100% of their capacity can be used. >> Leak-proof. Can also be installed upside down, as it contains no liquid electrolyte and the battery is factory sealed. >> Sealed maintenance-free. Firmly closed, cannot and must not be opened. >> An LED display shows the battery charge level at any time. >> Mountable in upside-down position (180°)

## SKYRICH LITHIUM ION BATTERIES

The latest in motorcycle battery technology - Skyrich Lithium Ion Phosphate (LiFePO4) batteries are smaller in size and lighter weight than conventional motorcycle batteries, packing a whole lot of power for a pocket-sized dynamo. Manufactured with patented technology they offer a direct, small and lightweight, equivalent to traditional lead acid motorcycle batteries. Lithium batteries are available as upgrade replacements for most lead-acid, maintenance-free, SLA and GEL batteries.

Skyrich Lithium batteries are manufactured with cells containing positive plates (LiFePO4) and negative plates (Graphite), isolated from each other by PP separators with organic solvents used as electrolyte, then completely sealed inside an aluminium-plastic pocket.

Skyrich Batteries are official **OEM suppliers** to many motorcycle manufacturers including **Ducati, MV Augusta, Aprilia, Kawasaki, KTM, Husqvarna, Beta, Sherco, GasGas** and **CCM**.

### LITHIUM ION BATTERY ADVANTAGES

- **ULTRA-LIGHTWEIGHT** - weighs just 1/3 of equivalent lead-acid battery
- **SUPER CRANKING POWER** - cranking current greater than 4 times a lead acid battery
- **FAST RECHARGE** - premium charge acceptance 90% within 6 minutes
- **ENVIRONMENTALLY FRIENDLY** - contains no heavy metals such as lead, cadmium or mercury
  - **NON-SPILLING** - contains no acid
- **EXCELLENT CYCLE LIFE** - 2000+ charging cycles for longevity
  - **READY TO INSTALL** - requires no commissioning
- **VERSATILE MOUNTING** - can be installed in any position

## SKYRICH LITHIUM-ION INTELLIGENT BATTERY CHARGER

A fully intelligent 12V, 2 amp battery charger. Charges and maintains all 12V lead acid, gel and Lithium Ion (LiFePO4) powersport batteries.

- The 12V 2Amp charger
- Maximises battery power and life
- Recovers deep discharged batteries
- Features UK 3-pin plug
- Supplied with interchangeable crocodile and ring terminal leads
- Suitable for Lead acid, Gel and Lithium Ion batteries

| PART NO.       | DESCRIPTION.        |
|----------------|---------------------|
| <b>LIPOBCH</b> | 3 Pin UK plug       |

## BATTERY & ALTERNATOR TESTER

Battery and alternator tester monitors the charge state of 12V batteries and alternator system, showing results with a simple traffic light display. Connecting to the battery by terminal leads, the unit will give a Poor, Fair or Good reading of battery state, and an indication of the operating status of the alternator when the engine is running. The unit is IP65 water-proof.

Battery State:

- No LED** – Faulty battery (<11.6V)
- Red LED** – Poor battery (11.6V+)
- Yellow LED** – Fair battery (12.0V+)
- Green LED** – Good battery (12.5V+)

Alternator Function:

- Green LED** – Charging system working well (13.5V detected)

| <b>EXHB001</b> | Large 4 stroke |
| <b>EXHB003</b> | Small 2 stroke |

### EXHAUST INLET REDUCER KIT

Inlet reducer kits consist of inter-changeable sleeves to allow exhaust fitment to narrower pipes.

### EXHAUST PACKING SHEETS

Ideally suited for repacking non-uniform shaped cans such as oval and tri-oval, which can be tricky to repack correctly with standard materials.

- Uniquely compressed material
- Low temperature melting thread
- Expands and fully fills chamber voids
- Ideal for repacking non-uniform shaped cans
- More efficient than traditional materials

- Shatterproof and shock resistant - to minimise the chance of breakage from the impact of stones and other debris.
- Rigid - to retain the screens shape and avoid distortion under extreme wind pressure and high temperatures.
- Safer - in extreme circumstances should the screen break, the resultant edges should not be sharp.

## HEAVY DUTY CAM CHAINS

Timing chains are made in Japan, OEM quality and have been developed in partnership with most of the important OEMs. The entire range is designed to optimise performance of all off road motorbikes, guaranteeing precision, silence, long life and reliability. The pins are manufactured using a special heat treatment and advanced technology during the the component assembly phase, to increase surface hardness and prevent the chain stretching under heavy usage.

# AP RACING – THE SCIENCE OF FRICTION

For over 50 years AP Racing, the UK-based company, has been at the forefront of the motorsport industry, creating 2 and 4 wheel winners.... AP Racing's unparalleled experience in racing brake technology places them in a unique position to evaluate friction materials and brake pad performance both on dyno test beds and through rigorous track testing. AP Racing have pushed the boundaries of motorcycle brake system design to their limits with products supplied to MotoGP, World and National Superbike Championships, Supermoto and Sidecars. AP Racing offers a comprehensive high performance aftermarket sinter and organic brake pad programme for motorbikes and scooters. Friction materials used in a brake system are a vital factor in the overall performance and safety of a system, therefore front and rear pads with specific friction compounds to cater for different braking requirements between front and rear calipers are essential. All AP Racing motorcycle and scooter brake pads are made in Europe according to the highest and most demanding quality standards in this business.

# MTX

## HIGH PERFORMANCE BRAKING

COVERING ROAD, OFF-ROAD & ATV

**OEM**  
ORIGINAL EQUIPMENT MANUFACTURER

### FLOATING DISCS

MTX floating rotors are made from two segments of stainless steel which are riveted together to allow the outer section of stainless steel to expand under extreme temperatures. The outer section is manufactured from Japanese SUS 420 stainless steel, then heat-treated to HRC 36+-2 while the centre of the rotor is manufactured from steel or alloy.

### SOLID DISC ROTORS

MTX solid rotors are constructed using one complete segment of SUS 420 stainless steel, then heat-treated to HRC 36+-2. Lightening and drill hole patterns are as per OEM designs to improve braking performance and reduce the temperature of the rotor.

For all disc application data + technical drawings see Bike It Product Supplement Catalogue or head over to our B2B website [www.bikeittrade.com](http://www.bikeittrade.com)

Drawing from its immense racing experience, MTX has refined the performance and tolerances now offering applications for almost every motorcycle brand and model on the market. Performance at your fingertips.

## FORK OIL SEALS

Fork Oil Seals are of superior quality and suitable for use in all types of motorcycle forks, whether they are of the traditional RWU (right way up/conventional) type or the modern USD (upside down) design.

Manufactured to achieve a balance between low frictional drag, maximum sealing effectiveness, and overall reliability, the fork seals provide optimal performance. They are designed to perform well in a wide range of climates and conditions, making them the most dependable and highest quality seals available. The seals are **sold in pairs**.

## BIKETEK PREMIUM HEATED GRIPS

Exclusive BikeTek heated grip set, provides efficient heat to rider's hands whilst riding, essential for cold winter riding. The controller is small and compact and it is operable via two simple, easy-to-use buttons that allow you to increase or decrease the temperature. I especially like this, rather than those with sliders or dials, as they're easier to operate when gloved up. The BikeTek grips have four heat settings and these are displayed by different coloured LEDs from blue (lower setting) to red (getting warmer)

- Multi-heat settings provide perfect heating for all conditions
- Simple two button controller box can be handlebar mounted for ease of on-ride use
- Detail grip pattern for optimum feel
- Easy installation onto all 22mm handlebars
- 22mm left, 25mm right grips
- Supplied complete with bar-end plugs

## FUEL FILTERS

### • Chrome/Glass Filters:

Have a stylish chrome finish, providing aesthetic appeal. Glass bowls allow visual inspection of the fuel, making it easier to spot any contaminants. Chrome construction can add durability and resistance to corrosion.

### • Inline Filters:

Are designed to be installed in the fuel line directly. They are generally compact and easy to install, fitting into the fuel line without taking up much space. Inline filters are often chosen for their simplicity and effectiveness.

| PART NO.         | DESCRIPTION.                                       |

## ALUMINIUM PADDOCK STANDS

The BikeTek Aluminium Race Paddock Stands are manufactured from ultra lightweight aluminium over-sized tubing offering a robust and sturdy build quality. Rear stands are supplied with bobbin fork mounts which are width adjustable to fit all twin swing-arm motorcycles, the mounts are lockable by means of integral allen head bolts. Suitable for all motorcycles fitted with swing arm bobbins / cotton reels.

Front stands are 1 piece construction, which can be height adjusted. Interchangeable pins allow for use on bikes with split level forks. These are serious upgrades from standard steel paddock stands! The locking bobbin fork mounts and light weight make it especially suited for track and paddock use where speed and ease of use is essential.

## FRONT HEAD STAND

The BikeTek front head stand folds out to enable a motorcycle to be lifted by the frontsteering head tube. This offers maximum access to the front end for all repair, cleaning and maintenance work. Each stand is supplied with a kit of 5 of the most popular sized head lift pins covering 90% of motorcycles (including 13mm, 15mm, 16.5mm, 17mm and 18mm).

Other larger size pins are available separately. Pins are easily and quickly changeable, making the stand extremely versatile across a wide range of bikes.

## STATIC REAR STAND

This rear stand from BikeTek offers a unique method of motorcycle storage, especially suited for dealership displays and long term private home storage. A 9mm steel support bar is inserted through the rear wheel axle, which is then secured to the stand body. The bike is pushed backwards and raises into position on the stand. Cleaning and maintenance work can be carried out when the bike is mounted on the stand (except for tasks that involve removal of the rear wheel). Front paddock stands can still be used in conjunction with the BikeTek static stand. Manufactured from 1.4mm steel, 23mm diameter tubing, the stand is a 1pc unit requiring no assembly and offering optimum strength and rigidity. Finished in durable powder-coating and with protective ground-contact bungs.

**PDSR014**

## 360° REAR FLOATING STAND

This device works in the same way as a rear paddock stand to raise the rear wheel of motorbikes. The stand incorporates a floating dolly set on 360° swivel castors, allowing the bike to be moved easily and accurately sideways and diagonally.

## LAP TIMER

A simple and reliable lap-timing unit for all race and practice purposes. The LCD-display receiver is easily mounted to road and off-road motorcycles, karts, cars and cycles.

- Compact and lightweight design
- Pitwall transmitter unit, powered by two AA batteries (not included)
- 15 metre range (transmitter<->receiver)
- Memory capacity of 64 laps / 99 minutes
- 65x40x11mm receiver unit with wired IR-eye
- Viewable data
- 40x20mm LCD display
- 940nm frequency

The receiver should be mounted to the vehicle in an appropriate position which does not interfere with vehicle functioning (self-adhesive Velcro mount included). When the receiver (fitted to the vehicle) passes by the IR transmitter (left in a suitable location such as pitwall) the lap number is displayed and time is recorded, building up data of lap splits. If multiple BikeTek lap timers are in use in the same session, just one transmitter should be used (ensure no more than one transmitter is in use).

It is the user's responsibility to ensure that lap timing devices are authorised for use at the track/circuit.

### IT'S ECO FRIENDLY

Manufacturing HDPE plastics requires only a fraction of the energy required to produce, further contributing to its classification of being Eco-friendly.

HDPE plastic is the most environmentally stable of all plastics – giving off no harmful fumes into the environment.

### Made from (HDPE) HIGH DENSITY POLYETHYLENE

HDPE is known for its large strength-to-density (maximum stress a material can withstand)

## FAST FLOW FUEL JUG - 10L & 20L

The quick-fill jug with its unique dry-break coupling is the perfect container to transport fuel in. It will enable a safe and non-drip filling of the fuel tank and will also stop the filling action when the fuel tank is full. In fact you will be able to turn it upside down and no fuel will come out until you compress the nozzle.

- Fluids stop flowing after reaching the end of the spout automatically
- Just pull up and the valve shuts off fluid flow
- No vent to open and close or to leak when pouring
- Stops over filling and prevents spilling

### OFF ROAD FRONT GRAB STRAP

Front fender straps are essential equipment for off road trial bike. Our unique design is a self supporting/semi-rigid solution, which is easy to use.

Fitment - Wrap one end of the strap around a fork leg directly under the lower triple-clamp. Re-thread the stainless buckles (making sure to feed the web back through the buckle to 'lock' it off). Repeat on the other fork making sure the haul loop its passed over the top of front mud guard.

PART NO.  
**T1ETUG03**

### OFF ROAD REAR GRAB STRAP

The fitting method for the rear strap are varied compared to the front strap. The basic idea is to install the strap around the rear sub-frame as easily as possible.

Please Note: Some brands may require the rear fender or rear side panels to be cut slightly to allow the webbing to have the best possible fit and hold. If cutting holes in the plastic are required then a soldering iron is ideal to use.

PLEASE NOTE: KTM EXC/EXC-F & HUSQVARNA TE/FE fitment is to the plastic grab areas under the rear fender or seat which are situated slightly back from the end of the subframe. Repeat on the other fork making sure the haul loop its passed over the top of front mud guard.

## ABS TOP BOXES

- ABS stands for Acrylonitrile Butadiene Styrene, a common thermoplastic polymer known for its durability and impact resistance.
- The ABS luggage top box is designed to be robust and withstand various weather conditions.
- Indicates the volume or storage capacity of the top box. In this case we have 3 options from 24 litre, 35 litre & 52 litres.
- The luggage box comes with a fitting bracket that is designed to be compatible with most carrier racks.
- This universality makes it easier for users to install on a variety of scooters.
- The top box is detachable from the fitting bracket. This feature is practical for users who may want to take the luggage with them when they leave the scooter.

### RACE SERIES TRACK & PADDOCK STANDS

MotoGP Race series track and paddock stands are essential for race and track days. The stands elevate the bike for ground clearance to remove wheels and improve access for repairs, bike set-up and to fit and remove tyre warmers. MotoGP stands are constructed from 32mm tube, fully reinforced for extra strength, finished in durable black powder coating with PU ground-stops on the underside of the handle for easier handle access and improved contact grip.

**Rear stands:** are supplied complete with spring loaded swingarm adaptors.

**Front stands:** are supplied with under fork adaptors.

### PRO SERIES PREMIUM 1PC PADDOCK STANDS

MotoGP Premium Pro series stands are manufactured from continuous uncut tubing, supplied as a ready-to-use stand requiring no self assembly of tube sections. This superior design and production minimises potential weakening and movement of the stand, compared to conventional multi-part self-assembly paddock stands.

Stands are constructed from 32mm cold rolled steel, 1.4mm thick tubing (1.9mm on headlift upper section), and incorporate internal reinforcement steel plugs for increased stand strength and stability.

All tube work is formed on leading CNC tube-bending machines ensuring optimum accuracy.

### PRO SERIES TYRE WARMER

Official MotoGP Pro series tyre warmer set, includes front and rear warmers.

Self fitting elasticated sides offer a snug fit and uniform heat distribution. Warmers heat to a thermostatically controlled 80 degree Celsius for optimum tyre temperature, and retain that setting until warmers are removed or switched off.

LED indicators clearly show when the warmers are heating or the thermostat is at the maximum temperature setting. Supplied with storage bag.

Easy view

### PRO SERIES DIGITAL TYRE WARMERS

Digitally controlled tyre warmer kit for optimum tyre preparation.

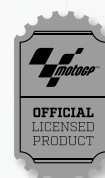

Both the front and rear warmers feature encased digital thermostat units which allow the user to manually input a desired temperature for the warmer to maintain.

The resulting advantage over standard tyre warmers is being able to heat the warmer to a higher or lower temperature according to weather conditions and time restraints, plus more accurate and easy to read data.

Features:

- LCD display for easy reading
- Power indicator light
- Temperature setting from 40-99 degree Celsius
- Real time temperature reading during heating
