PRORIDER GEAR

PANT SPEC'S

- Pre-curved fit for optimal performance and an intuitive racing position
- Core construction in dobby fabric, light and resistant
- Silicon waist to keep the jersey in position
- Adjustable micrometric buckle
- Anti-mud zipper
- Vented inner liner with stretch lycra insert
- 4 ways stretch spandex inner legs insert allowing ease of movement
- Laser cut vented panels for an optimum airflow
- Articulated stretch knee for a maximum flexibility
- Foam reinforcement
- Heat and abrasion resistant leather panels
- Rear yoke in stretch spandex for comfort and flexibility
- Reinforced rear saddle panel
- Shin vented panel
- TPR patches finish
- Never fading color sublimation process

JERSEY SPEC'S

- Light weight jersey
- Adjusted performance fit for maximum flexibility
- Tailored raglan sleeves
- Comfortable hem cuff finish
- Strategic vented mesh panels for an optimum airflow
- Longer tail to keep the jersey in position
- Signature TPR
- Never fading color sublimation process

GLOVE SPEC'S

- New adjusted fit
- Never fading color sublimation process
- Liteprene panels for an optimal comfort
- Velcro adjustable wrist closure
- Articulated thumbs in lycra
- Reinforced thumb
- 3D vented mesh for an optimum airflow
- Lycra gusset for a perfect fit
- Suede reinforced palm
- Silicone finger prints for an optimal grip and control
- TPR patches finish

AIRFLAPSTM

BY SHOT

Simple, light and compatible with almost any helmet. Airflaps is a patented device allowing you to hold the goggles slightly indented from the face. The airflow generated behind the lens and under the helmet offer a real advantage for safety and comfort.

Order Code: **SMXBDY005**

- Airflaps stop and delay the formation of fog during intense riding
- Speeds up the disappearance of the fog
- Reduces the temperature under the helmet
- Eases the face from the goggles pressure
- Dries the perspiration in the goggle foam

airflaps in **CLOSED POSITION**
goggles stuck on the face

airflaps in **PIVOT POSITION**
front > back

airflaps in **OPEN POSITION**
goggles indented from the face

OPERATION AND INSTALLATION

Airflaps consist of two elements positioned on both sides of the helmet. Installing Airflaps takes only a few seconds. It is fixed in place by double face adhesive 3M similar to that used for GoPro. It requires no transformation to alter the properties of the helmet. Thanks to the system of pre-settings by screws, the riders can adjust the space between the goggles and their face. By removing the screw completely, we separate the shutters from the base of the fixture. These then serve as a guide for the strap of the mask.
